

### >> Type of use (\*)

\* Recommended for manual welding techniques with light formation of platters and drop e.g gas welding, TIG welding, MIG welding, micro plasma welding, brazing, spot welding, MIMA welding (with rutile covered electrode) for operation of machine e.g oxygen cutting machines, plasma cutting machines, machines for thermal spraying, bench welding.

\* Recommended for manual welding techniques with heavy formation of splatters and drops e.g MIMA welding (with basic or cellulose covered electrode), MAG welding (with CO<sup>2</sup> or mixed gases), MID welding (with high current), self-shielded flux cored arc welding, plasma cutting, gouging, oxygen cutting, thermal spraying for operation of machines e.g in confined spaces, at overhead welding/cutting or in comparable constrained positions.

This clothing is intended to protect against flames molten metal splatter, radiant heat and short term, accidental electrical contact.

(more information and uses: please check the user information enclosed with the product).

### >> Technical features

- ✓ Welding apron. 90 x 70 cm.
- ✓ Cow split leather, aramid yarn.
- ✓ Thickness: 1,40 mm (± 0,1 mm).
- ✓ With bib.
- ✓ With leather strap and adjustable buckle.
- ✓ Brown colour.
- ✓ Packing: - carton of 20 pieces. 
- each apron under individual polybag.

To be used with other protective equipments (welding trousers, jackets, gloves, shoes...) in order to obtain the appropriate protection.

### >> Advantages

- ✓ Stringent selection of split hide for the manufacture of this product.
- ✓ Resistance and flexibility of the leather.
- ✓ Simple and quick adjustment system in the back (tie a knot with the straps).

### >> Compliance

This equipment has been tested according to the following European Standards:

- **EN ISO 13688: 2013.** Protective garment. General requirements.
- **EN ISO 11611 : 2007.** Protective clothing for use in welding and allied processes. **Class 2 - A1+A2.**
- **EN ISO 11612 : 2008.** Protective clothing. Clothing to protect against heat and flame. **A1 A2 B2 C1 E1 F2.**

It complies with the European **Regulation (EU) 2016/425** on Personal Protective Equipment (PPE). **Category II.**

EU type examination certificate (**module B**) issued by **MIRTA-KONTROL.d.o.o.** Notified body n°2474.

Download the EU declaration of conformity on: <http://docs.singer.fr>

ISO 11611:2007 specifies two classes with specific performance requirements, i.e. Class 1 being the lower level and Class 2 the higher level.

- Class 1 is protection against less hazardous welding techniques and situations, causing lower levels of spatter and radiant heat.
- Class 2 is protection against more hazardous welding techniques and situations, causing higher levels of spatter and radiant heat.

The letter A1 or A2 corresponds to the method of test used for the limited flame spread, according to ISO 15025:2000 standard.
